LightSquared Subsidiary LLC Request for Modification of Its Authority for an Ancillary
Terrestrial Component

FCC File Number: SAT-MOD-20101118-00239

Dear Federal Communications Commission:

I ask that the FCC quickly approve LightSquared's desired modification of its authority for an Ancillary Terrestrial Component because the wireless market is not able to keep up with bandwidth demand. Approving LightSquared's request will allow new wireless companies to enter into the market. In turn, new wireless companies will provide more competition in the market, which will increase productivity of businesses by reducing prices.

Lower rates will also expand wireless access to customers previously priced out of the expensive technology. President Obama and Chairman Genachowski have been actively promoting universal broadband. I believe approval of LightSquared's request will help the FCC meet these important goals, so please do what you can to expedite LightSquared's request.

Respectfully submitted,

Ms. Rosalie M. Hasseltine
44 S. Greenfield Road, Unit 9 Mesa, Arizona 85206

Date of submission: 9 December 2010
